

## **EJ BioMed Expands Presence at MD&M in Anaheim**

Denver, Colo. – January 30, 2014 – EJ BioMed, an Eldon James Company, announced today that they will have an expanded presence this year at the MD&M West exhibition in Anaheim, February 11-13. Displays will highlight new innovations and capabilities including a 15,000 square foot cleanroom, adhesive free tubing and connector assemblies and the expanded extrusion capacity for their 18 standard lines of PVC FREE plastic tubing.

“This year at MD&M West, we are excited to highlight the capabilities of our new, state-of-the-art, 75,000 square foot manufacturing facility,” exclaimed Mark Timbrook, Director of Marketing for Eldon James. “This facility is now online, fully functioning and validated under our existing ISO 13485:2003 certification. The new facility significantly expands our capacity to be one source for cleanroom manufacturing, assembly and packaging of plastic tubing and connectors.”

EJ BioMed has now become one of the only U.S. manufacturers that can produce, assemble and package PVC FREE tubing and fitting assemblies all within a single Class 7 cleanroom environment.

You can find EJ BioMed in Hall D in the MEDPAK section at booth 2249. For more information, contact Eldon James Corporation at 970-667-2728 or visit online at [www.EJBioMed.com](http://www.EJBioMed.com).
