

# WINE ON TAP

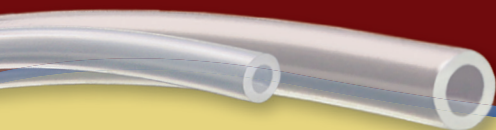

## Protect the Flavor of Your Wine

### Flexible Tubing Innovation

Upgrade your tubing with  
EJ Beverage PVC-Free KFlex Tubing

- PVC-Free – no additives such as DEHP or plasticizers making it the healthier alternative to PVC tubing.
- Low propensity to absorb flavors from previous beverage exposure.
- Superior barrier properties
- Chemical resistance, often a lower cost alternative to stainless steel.
- Non-corrosive and extremely durable
- Medical and NSF compliant material

**Make the switch TODAY!**

# Tap into Quality

## KFlex flexible tubing for beverage dispensing systems

- Applications for KFlex tubing are being used as the preferred beverage tubing for dispensing keg wine and beer and bottled liquor.
- KFlex tubing is flexible enough to fit in tight spaces where stainless steel has previously been used in draft systems and coolers.
- The use of KFlex tubing reduces the cost of running stainless steel line and saves time when installing the flexible tube.

## Wine on Tap – THE GREEN ALTERNATIVE

- Green and environmentally friendly
- Reduces waste of bottles and product due to oxidation.
- Reduces transportation costs.
- Your favorite bar or restaurant can increase the selection of wines on the menu
- No corks to pull so you get your glass of wine faster!
- KFlex tubing is the new choice in tubing to replace stainless steel and PVC in beverage dispensing.
