Product Change Notification – Change of Kynar® material grade

To our Kynar® Fitting Customers,

As awareness and global regulations move towards restriction of materials using PFAS surfactants, we are making a change of materials to offer you a Kynar material that does not contain these chemicals of concern.

We will now be manufacturing your fittings using Kynar® 740 material. In the future you will order these parts using the **NK7** suffix instead of NK. An example of the part number will be C0-4NK7.

Our supplier will stop manufacturing the Kynar® 1000HD material on December 31, 2021. We have many parts still in inventory that can be purchased, but all new parts from today forward will be manufactured using Kynar® 740 grade material.

Please contact us if you have any further questions.

I would like to take this opportunity to thank you for your business.

Sincerely,

Marcia Coulson
President
