# ELDON JAMES

Braided silicone alternative tubing engineered for high-purity fluid under pressure with biocompatibility for demanding biomedical and pharmaceutical applications.

Braided Flexelene<sup>™</sup> 135C has been developed to meet the critical demands of bioprocess, medical and laboratory applications. This newly formulated TPE (thermoplastic elastomer) tubing is an excellent alternative to silicone.

FLXCBR135C tubing is durable and an excellent choice for use in high pressure applications. Sterilized by Ethylene Oxide (EtO), Gamma resistance to 45 kGy, Autoclave to 135C, temperature range -80°C to 135°C (-112°F to 275°F), RoHS Compliant, Shore A 68 Hardness.

Manufactured for ultra-pure fluid transfer and meets a diverse range of pharmaceutical, medical and biopocessing applications. Braided Flexelene™ 135C meets the requirements of REACH, RoHS, USP 661, CFR, USP VI, ISO 9001 and 13485 and other special test requirements.

# Typical Applications:

- Pharmaceutical and biotech processing
- Single-use systems
- High volume ultra-pure fluid transfer
- Media processing
- Sterile filling
- Laboratory use
- Skid transfers
- Processing lines

## **Product Features:**

- Superior Bio Compatibility
- No Halogens or Phthalates
- High Pressure Rating
- Extremely Flexible
- Ultra-low Extractables / Leachables
- USP 661 Compliant
- REACH and RoHS Compliant
- Non-pyrogenic Material
- Non-animal derived BSE/TSE compliant
- Ultra-Pure Medical Grade
- Material Certificate and Lot Traceability

## Typical Material Physical Properties

| Property                           | Value / Rating                               | ATSM<br>Method |
|------------------------------------|--|----------------|
| Durometer, (Hardness) Shore A      | 68   | D2240          |
| Color                              | Translucent Solid                            | N/A            |
| Specific Gravity - (Cured 1:1 A&B) | .89  | D792           |
| Tensile Strength psi (Mpa)         | (Break, 73 °F / 22.3 °C)<br>870 psi 6.00 MPa | D 412          |
| Elongation - %                     | (Break, 73 °F / 22.3 °C)<br>470 %            | D 412          |

Testing completed on raw materials

|-------------|--------|----------------|--------|----------------|-------|-------------|---------------------------|--|
| FLXCBR2-6   | 1/8"   | 0.1 25 ± 0.005 | 3/8"   | 0.375± 0.005   | 1/8"  | 25, 50 ft.  | 0.25                      | 162 psi (11.16 bar)                                    |
| FLXCBR4-8   | 1/4"   | 0.265 ± 0.005  | 1/2"   | 0.510 ± 0.008  | 1/8"  | 25, 50 ft.  | 0.44                      | 116 psi (8.0 bar)                                      |
| FLXCBR6-10  | 3/8"   | 0.385 ± 0.008  | 5/8"   | 0.635 ± 0.008  | 1/8"  | 25, 50 ft.  | 0.88                      | 95 psi (6.55 bar)                                      |
| FLXCBR8-12  | 1/2"   | 0.510 ± 0.008  | 3/4"   | 0.760 ± 0.010  | 1/8"  | 25, 50 ft.  | 1.13                      | 110 psi (7.58 bar)                                     |
| FLXCBR10-16 | 5/8"   | 0.635 ± 0.010  | 1"     | 1.010 ± 0.010  | 1/8"  | 25, 50 ft.  | 1.50                      | 118 psi (8.14 bar)                                     |
| FLXCBR12-18 | 3/4"   | 0.760 ± 0.010  | 1 1/8" | l.135 ± 0.010  | 3/16" | 25, 50 ft.  | 2.00                      | 90 psi (6.20 bar)                                      |
| FLXCBR16-22 | 1"     | I.010 ± 0.020  | 1 3/8" | l .375 ± 0.020 | 3/16" | 25 ft.      | 2.50                      | 56 psi (3.86 bar)                                      |

<sup>\*</sup>Working pressure is determined using a 4:1 safety factor of the maximum burst pressure per ASTM D1599

## Other Specifications

| Property                  | Value / Rating                                     |
|---------------------------|--|
| Protein Binding           | Low - will not absorb your product                 |
| Gas Permeability          | Low - 2260- Barrier 02 (CC/MIL/100),<br>N2/ATM/Day |
| Multiple Autoclave Cycles | Can be re-sterilized and reused                    |
| Temperature               | Min: -80°C (-112°F)                                |
|                           | Max: 135°C (+275°F)                                |
| Brittle Temperature       | -55°C ( -67°F)                                     |

Information provided by material vendor

#### Certifications

- USP Class VI biocompatibility requirements
- USP 661 Compliant
- Cytotoxicity Criteria
- CFR Title 21 Section 177.2600
- ISO 10993 (part 4 and 5)

- REACH Compliant
- RoHS Compliant
- Cleanroom Manufactured
- Fully Lot Traceable
- Non-animal derived BSE/TSE compliant

### Sterilization

Tubing can be sterilized by one of these methods:

- E-beam/Gamma 25 to 45 kGy, no deficiencies, may color shift at higher doses.
- EtO No issues. Can safely be used.
- Autoclave Up to 135°C (30 minute cycle).
